

EXPERIMENT 8:

1)

```
mysql> SELECT cursoeno, assessment, marks
-> FROM student_score s1
-> WHERE marks > (
->     SELECT AVG(marks)
->     FROM student_score s2
->     WHERE s2.curseno = s1.curseno
-> );
```

cursoeno	assessment	marks
C01	Final	90
C01	Model	70

2 rows in set (0.04 sec)

2)

```
mysql> SELECT regno, name, COUNT(assessment) AS number_of_assessments
-> FROM student_score
-> GROUP BY regno, name
-> HAVING COUNT(assessment) > 1;
```

regno	name	number_of_assessments
S01	Ameen	2

1 row in set (0.05 sec)

3)

```
mysql> SELECT faculty, doj
-> FROM student_score
-> WHERE doj = (
->     SELECT MAX(doj)
->     FROM student_score
-> );
```

faculty	doj
Ravi	2025-08-10

1 row in set (0.07 sec)

4)

```
mysql> SELECT *
-> FROM student_score
-> WHERE marks > (
->     SELECT AVG(marks)
->     FROM student_score
-> );
```

regno	name	curseno	marks	faculty	doj	assessment
