

VIEW

Employees table:

```
mysql> SELECT * FROM employees1;
+-----+-----+-----+-----+
| employee_id | employee_name | department | salary |
+-----+-----+-----+-----+
|          101 | Arun          | HR         | 35000  |
|          102 | Priya         | IT         | 45000  |
|          103 | Rahul         | Sales      | 40000  |
|          104 | Meena         | Finance    | 50000  |
+-----+-----+-----+-----+
4 rows in set (0.00 sec)
```

1. Create a view with name 'v1' using employees1 table which holds the value of employee_id and salary of employee.

```
mysql> create VIEW v1 as select employee_id,salary from employee
s1;
Query OK, 0 rows affected (0.01 sec)

mysql> SELECT * FROM v1;
+-----+-----+
| employee_id | salary |
+-----+-----+
|          101 | 35000 |
|          102 | 45000 |
|          103 | 40000 |
|          104 | 50000 |
+-----+-----+
4 rows in set (0.00 sec)
```

2. Do the insert and delete records from v1 table.

Insert values into view table:

```
mysql> Insert into v1 values (106,55000);
Query OK, 1 row affected (0.00 sec)

mysql> select * from employees1;
+-----+-----+-----+-----+
| employee_id | employee_name | department | salary |
+-----+-----+-----+-----+
|          101 | Arun          | HR         | 35000  |
|          102 | Priya         | IT         | 45000  |
|          103 | Rahul         | Sales      | 40000  |
|          104 | Meena         | Finance    | 50000  |
|          106 | NULL          | NULL       | 55000  |
+-----+-----+-----+-----+
5 rows in set (0.00 sec)
```

Delete from view table:

```
mysql> Delete from v1 where employee_id=106;
Query OK, 1 row affected (0.00 sec)

mysql> select * from empolyees1;
ERROR 1146 (42S02): Table 'viewnew.empolyees1' doesn't exist
mysql> SELECT * FROM employees1;
+-----+-----+-----+-----+
| employee_id | employee_name | department | salary |
+-----+-----+-----+-----+
|          101 | Arun          | HR         | 35000  |
|          102 | Priya         | IT         | 45000  |
|          103 | Rahul         | Sales      | 40000  |
|          104 | Meena         | Finance    | 50000  |
+-----+-----+-----+-----+
4 rows in set (0.00 sec)
```

INDEX

1. Create index1 for 'salary' attribute from employees1 relation and list the first name of the employees whose salary is above 145000 and explain the working principle of indexing and then drop the index1.

Employees1 Table:

```
mysql> SELECT * FROM employees1;
+-----+-----+-----+-----+
| employee_id | first_name | department | salary |
+-----+-----+-----+-----+
|          1 | Arun      | HR         | 120000 |
|          2 | Priya     | IT         | 150000 |
|          3 | Rahul     | Sales      | 160000 |
|          4 | Meena     | Finance    | 180000 |
|          5 | Karthik   | IT         | 130000 |
|          6 | Divya     | HR         | 170000 |
|          7 | Nisha     | Sales      | 145000 |
|          8 | John      | Finance    | 155000 |
|          9 | Vikram    | IT         | 140000 |
|         10 | Ratnam    | Sales      | 200000 |
+-----+-----+-----+-----+
```

Display of First name whose salary >145000:

```
mysql> SELECT first_name FROM employees1 WHERE salary >145000;
+-----+
| first_name |
+-----+
| Priya      |
| John       |
| Rahul      |
| Divya      |
| Meena      |
| Ratnam     |
+-----+
6 rows in set (0.00 sec)

mysql> DROP INDEX index1 ON employees1;
Query OK, 0 rows affected (0.01 sec)
Records: 0 Duplicates: 0 Warnings: 0
```

2) Create index1 for 'employee_id' attribute and display the first name of an employee whose employee id is 10 and explain the working principle of index1.

```
mysql> CREATE INDEX index1
      -> ON employees1(employee_id);
Query OK, 0 rows affected (0.04 sec)
Records: 0 Duplicates: 0 Warnings: 0

mysql> SELECT first_name FROM employees1 WHERE employee_id=10;
+-----+
| first_name |
+-----+
| Ratnam     |
+-----+
1 row in set (0.00 sec)
```
